### Message

It gives me immense pleasure to learn that site on Women Empowerment on the official website of the Company is going to be launched.

Empowerment of women working in an organisation is crucial for enhancing growth and promoting competitiveness in the economy. CCL provides a safe gender friendly working environment for advancement and growth of women employees.

The 'Women Empowerment' site is a one step forward in this direction. It would provide an interactive platform for the women working in the Company not only for sharing their experiences but also learning about the achievers of the society in different fields. It would thus help in bringing about holistic development of women and enhance their competencies and proficiencies.

I believe this platform would propel them forward and showcase their work for others to follow.

With best wishes.
