Message

This forum would provide an opportunity for women in public sectors to utilize their full potential at all levels and would provide unflinching support to achieve their legitimate position in the organization. It would also play a catalytic role in promoting the integrated growth of women in public sector and aid in enhancing their skills and capabilities.

Concerted efforts need to be taken to create an environment which will maximize the potential of women and help them in realizing their roles and responsibilities towards the organization.

Thus our country should thus be catapulted into the horizon of empowerment of women and revel in its glory. The journey of emancipation of women has crossed many milestones. But affirmative action is required for women to play their rightful role in the organization and the society as well.

I wish the forum success in all its future endeavours.

D.K Ghosh
Director(Finance)
