पत्रांक सं. सी०सी०एल०/निदेशक तकनीकी (सं०)/सतर्कता/SIM Contract. Tipping Trucks/194 दिनांक: 20/12/2024

सेवा में,

महाप्रबंधक/विभागाध्यक्ष
E&T, Ranchi

विषय: System Improvement measure regarding engagement of contractual tipping trucks to ply in the mines under mining contracts.

Ref. No. CCL/Vig./TS/SI/19/2024 Dated 09/12/2024

महोदय,

During weekly surprise inspections of IT initiatives, Vigilance Department observed discrepancies in the approval processes for engaging contractual tipping trucks across different areas of CCL. Key issues include permitting vehicles to ply prior to GPS installation and the redirection of trucks by contractor without authorization/notification to Engineer-in-Charge or the Project Officer.

To address this, a standardized approval process is recommended, including verification of vehicle details, GPS installation, and formal approval for operation (as detailed in the enclosed letter).

Further, a crucial recommendation is to develop a digital module to for allowing and disallowing vehicles in mining/transportation contracts, which will:

- Allow contractors to directly upload vehicle details, eliminating manual data entry.
- Integrate with VAHAN or similar portals to verify vehicle details.
- Automate weighbridge checks by cross-referencing approved vehicle lists.
- Ensure only Approved and GPS-equipped vehicles are allowed for operations.
- Control vehicle removal from contracts, requiring prior approval from the Engineer-in-Charge or Project Officer.
- Enhance operational efficiency and standardize the system.

You are directed to implement the system improvement measures relating to development of a module for allowing and disallowing vehicles as suggested by the Vigilance Department, CCL.

(Encl: as above)
